

Electrical Contracting Services

R.A.S. Electrical, with 35 years commercial experience, is the electrical contracting division of the R. A. S. Group.

R.A.S. Electrical provides electrical contracting services to Commercial, Industrial and Semi State organisations and companies. It has a broad customer base and has experience in providing services in many sectors.

Electrical Contractors

R. A. S. Electrical provides services to the following sectors: -

- Manufacturing Companies
- Financial Institutions
- Newspaper Publishers
- Insurance Companies
- Educational Institutions
- Training Bodies
- Hospital
- Nursing Homes
- Pharmaceutical Companies
- Chemical Industries
- Information Technology

The services provided are backed by a wealth of experience in the electrical engineering business and the company's commitment to its customers through Technical Excellence and Quality.

The training of staff is vital for the continual achievement of standards and results. The company insists that all installation staff are trained through the FAS Electrical Apprenticeship Training Scheme. Qualified staff are actively encouraged to update and enhance their qualifications by the attendance at industry approved training courses.

The company believes that the safety of staff in the working environment is of paramount importance and all installation staff receive safety training as well as achieving the FAS Safe Pass Certification before commencing employment.

R.A.S. Electrical is a long-standing member of the Association of Electrical Contractors of Ireland (A.E.C.I.) and it believes in, and supports, the development of the highest standards for the electrical contracting industry.

R.A.S. Electrical has achieved and maintains the required standard for certification as a registered electrical contractor by the Register of Electrical Contractors of Ireland (R.E.C.I.) and the company is regularly inspected by R.E.C.I. for ongoing compliance with the required Electrical Standards as issued by the Electro Technical Council of Ireland.

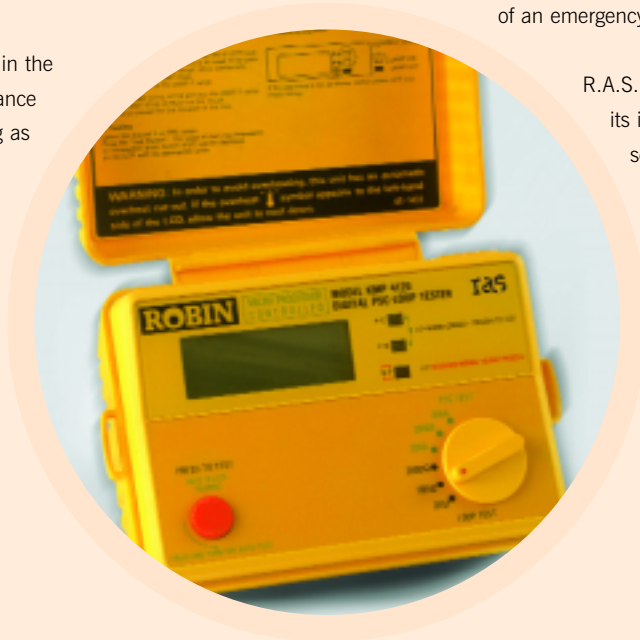

R.A.S. Electrical can provide electrical contracting solutions from design, through installation to certification to the following standards: -

- Electrical Installations to ET 101:2000
- Periodic Electrical Installation Inspections to ET 101:2000
- Emergency Lighting Systems to I.S. 3217
- Fire Alarm System to I.S. 3218
- Portable Appliance Testing to S.I. 188:2001

The company has vast experience in the design and installation of electrical distribution systems, lighting systems, heating systems and plant process control systems.

The company has a modern fleet of service vehicles that provide a fast response to customers in the event of an emergency. The company provides maintenance contract cover to customers who may require assistance on a 24/7 basis in the event of an emergency.

R.A.S. Electrical prides itself on its innovative and cutting edge solutions, and in keeping with the R.A.S. Group's stated philosophy, continues to deliver Technical Excellence and Quality to a wide range of customers.
