

Security Systems

R.A.S. Security Systems is the security systems division of the R.A.S. Group – and has been in business for over 20 years.

R.A.S. Security Systems provides security services to Commercial, Industrial, Domestic and Semi State organisations and companies. It has a broad customer base and has experience in providing services to all industry sectors.

Security Systems

The services provided by the R.A.S. Security Systems include:

Intruder Alarm Systems ranging from domestic systems to large commercial systems - with remote access and integration with other systems.

Personal Attack Alarms for protection of at-risk personnel.

Access Control Systems from single door systems to multi door integrated systems with remote monitoring from multiple locations.

Closed Circuit Television Systems from single camera systems to fully managed multiple camera installations with Analogue or Digital Recording with remote monitoring via ISDN or Internet.

Fire Alarm Systems from single zone conventional to multi zone Analogue Addressable Systems that can be networked between buildings on a large campus.

Audio and Video Intercom system from single door to multiple door systems with different operational requirements for entry doors.

Security Risk Analysis Consultancy Service for premises and people at risk from criminal activity.

The services provided are backed by an extensive experience in the electronic security systems business and the company's commitment to its customers through Technical Excellence and Quality.

R.A.S. Security Systems commitment to quality is an absolute priority. The company is a member of the Irish Security Industry Association (ISIA) and the Managing Director of the R.A.S. Group, Martin Stairs, has served for two terms as the elected Chairman of the Electronics Division of the ISIA. During his term in office he was instrumental in the formalising of quality standards for the Irish Security Industry Association through the establishment of a Qualicert Certification Scheme for best practice in the security industry. He was the driving force behind the introduction of the European Standard for Intruder Alarm Systems EN 50131

and was the ISIA representative to the Electro Technical Council of Ireland, Technical Committee TC 13 for Security System Standards.

R.A.S. Security Systems was the first company to receive both Qualicert Certification Scheme for best practice in the security industry and certification to the requirements of the European Standard for Intruder Alarm Systems EN 50131.

R.A.S. Security Systems can provide security solutions from design, through installation to certification to the following standards: -

Intruder Alarm Systems to EN 50131

Fire Alarm System to I.S. 3218

C.C.T.V. Systems to EN 50132

The company has vast experience in the design and installation of intruder alarm systems, CCTV systems, Access Control and Intercom systems. The company provides integrated solutions, which allow the interconnection of different systems into a managed security solution for large installations.

The company has a modern fleet of service vehicles that provide a fast response to customers in the event of an emergency. The company provides maintenance contract cover to customers who may require assistance on a 24/7 basis in the event of an emergency.

R. A. S. Security Systems prides itself on its innovative and cutting edge solutions, and in keeping with the R. A. S. Group's stated philosophy, continues to deliver to its customers Technical Excellence and Quality.
